Digital Literacy Skills Are Essential in Today's Job Market.

According to a survey from Capital One Financial Corp. and Burning Glass Technologies, 80% of middle-skill job openings require some kind of digital proficiency. This includes knowing how to use Microsoft Excel, Microsoft Word, computers, and the Internet effectively. In addition, jobs requiring these skills offer wages 18% higher than jobs that do not.

Cirrus is the perfect solution to upskill learners and job seekers.

Cirrus is a next-generation learning environment that builds foundational to mastery-level skills in Microsoft Office and computer concepts. Cirrus seamlessly delivers training and assessment activities in a cloud-based environment learners can access anytime, anywhere. No installations required.

Video demonstrations and text-based instructions teach learners exactly how to perform skills successfully. Immediate, personalized feedback allows learners to pinpoint errors they make and understand how to self-correct those errors to stay on track with learning objectives.

Key Features

- Provides anytime, anywhere access from PCs, Macs, and Chromebooks. This gives programs flexibility to deliver training remotely and in-person.

- Allows learners to work live-in-the-application. No installations required.

- Includes the *Quick Resume Guide* and a hands-on, resume-building activity to equip learners with an essential tool for navigating the job search effectively.

- Delivers self-led, self-paced instruction and assessments that are ideal for programs serving a variety of learners with myriad needs. No instructor is needed.

- Overcomes obstacles associated with one-size-fits-all course structures by giving learners flexibility to complete all activities and assessments or just those that pertain to the skills they need most.

- Offers flexibility to deliver additional instructional content and career development resources, including assessments, videos, and eBooks.

- Provides technical support, onboarding preparation, and professional development training to help administrators, educators, and learners use Cirrus to its full potential.

- Helps learners and job seekers develop the digital literacy skills needed to complete online job applications, research employers, and find employment opportunities online.

- Meets ADA requirements.
